

National Severe Weather Warning Service

Chief Forecasters Assessment

An active frontal system is expected to move across Northern Ireland during Thursday. 10-20 mm of rain is expected to fall in a fairly short space of time, with perhaps up to 30mm in one or two places. The rain will be accompanied by squally southerly winds with gusts of 50 to 60 mph, perhaps with isolated gusts to 70mph in exposed eastern areas. Leaf and tree debris will increase the risk of localised flooding.

The Met Office have issued a **Yellow Warning of Rain**

Valid from **02:00 on Thu, 22nd Nov 2012** until **09:00 on Thu, 22nd Nov 2012**

A band of heavy rain will spread east across Northern Ireland in the early hours of Thursday morning, lasting into the rush-hour period. The rain will be accompanied by very strong and squally southerly winds. The public should be aware that this may lead to localised flooding and possible disruption to transport.
